Webinar on Multilayered Plastic Waste collection

Timestamp	2/10/2022 10:43:25
Email Address	radavevs@gmail.com
Name of the activity:	Webinar on Multilayered Plastic Waste collection
Date:	1st April 2021
Time:	4:00:00 AM
Venue:	Microsoft Teams
Faculty:	Commerce Regular
Department / Committee:	NSS
Organisers / Cordinators Name:	GRAMPUROHIT BHAGYASHREE
Organisers / Cordinators Contact No:	8286638600
No. of Participants (Total):	112
No. of Participants (Male):	38
No. of Participants (Female):	74
No. of Participants (Others):	Teachers = 4
Nature of the Activity:	Environmental
Topic/ Subject of the activity	Webinar on MLP waste
Objective for conducting the activity:	To generate awareness regarding MLP waste
Briefly mention the methodology used:	Audio-visual presentation
Briefly mention the outcome of the activity:	Students got encouraged to contribute to the Multilayered Plastic waste collection activity ongoing in the college since December 2020
Proofs attached:	Student List Of participation, Photos, Report
Comment (if any):	NO

Multi Layered Plastic Waste Collection Campaign

REPORT

Date: 1-04-2021

No of students present: 112

MLPs are basically wrappers containing shiny layer. It has 2-3 layers of plastic and one layer of metal. It is used widely because it is lightweight and effective for storing food in it

But It is difficult to recycle, it is non-degradable and it has no market value. So, ragpickers also avoid collecting it. It goes directly to the dumping ground and it is burnt in the open which causes air pollution. Some of the waste get drained off in sewage and causes flooding during the monsoon.

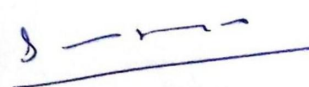

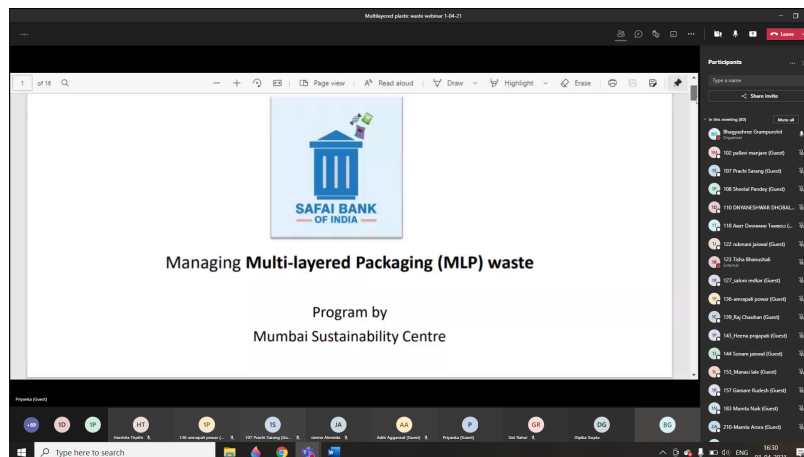

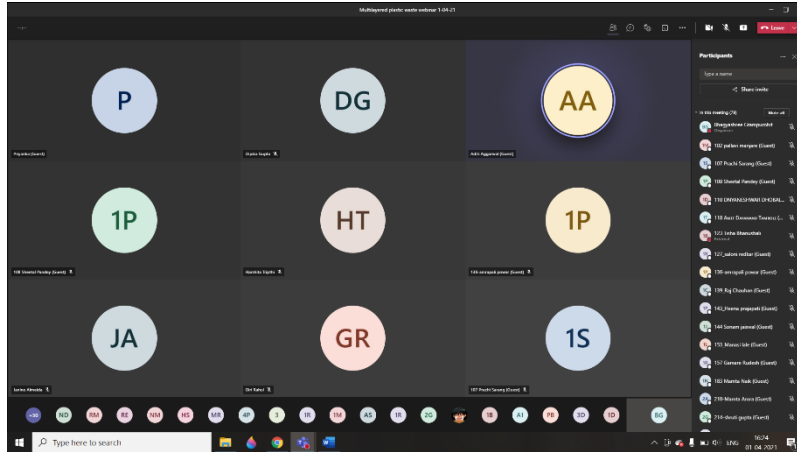

When we collect MLP waste separately for co-processing and recycling, it reduces the burden on waste management systems. It prevents land degradation due to landfilling, air pollution and choking of drainage systems. Recycling of any plastic waste has limitations as it cannot be recycled again and again. Therefore, co-processing is preferred to manage this waste in better way.

It goes for co-processing in cement factories. This plastic is cut into pieces and burnt at 1000-degree farad. This reduces air pollution to a great extent. Remains of MLP waste in the form of ash is also added to the cement.

Ramanand Arya DAV College organized this campaign with a webinar for NSS volunteers on 13th November 2020. The college collected 12 kg till March 2021. It is a huge amount of waste collection as 1 kg contains around 1000 wrappers. A Webinar on MLP waste collection was also organized for college students other than NSS volunteers on 1st April 2021. College has taken an initiative to inspire each and everyone who is a part of the college in this campaign to achieve our goal of reducing pollution arising due to waste.

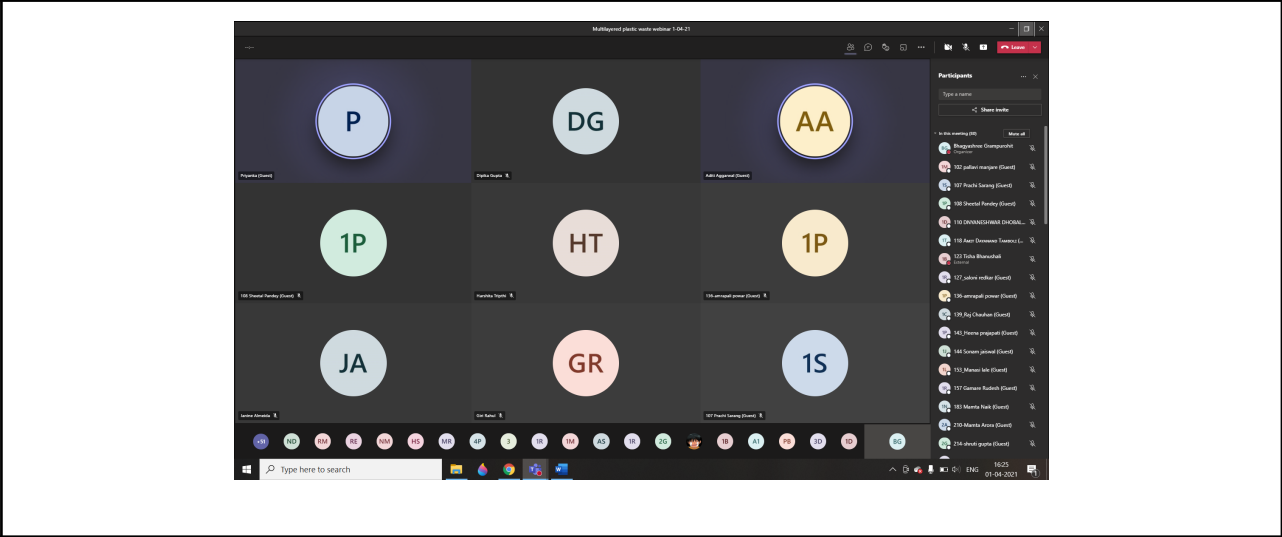

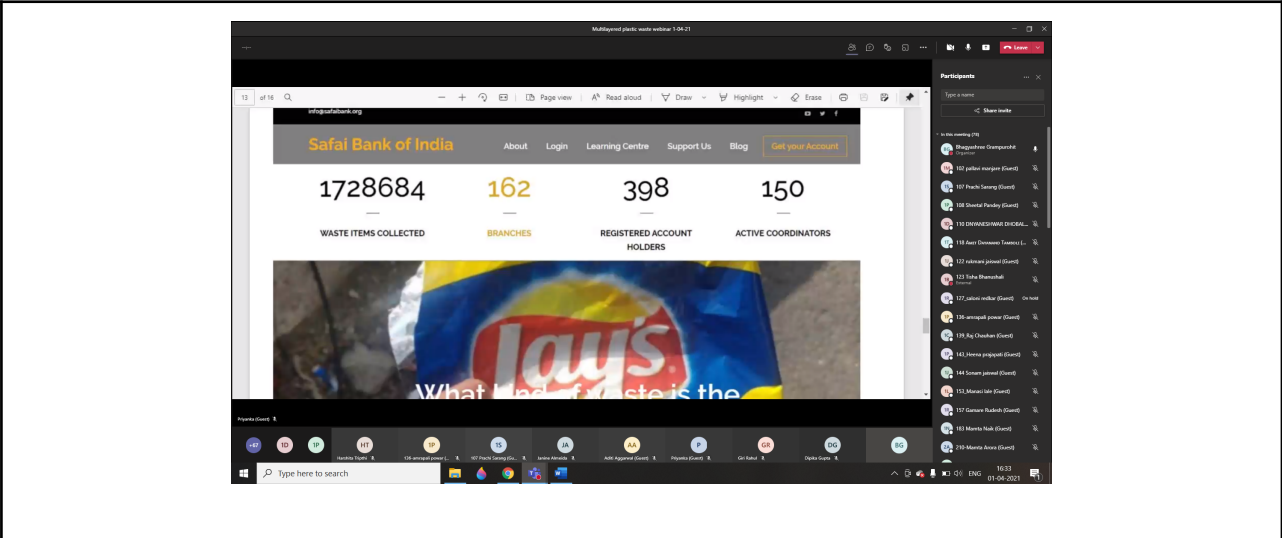

Screenshots of the webinar organized on 1st April 2021:
